| Show Infozone       | <input type="text" value="Yes"/>                     |
| Infozone Height     | <input type="text" value="50px"/>                    |
| Show Thumbs         | <input type="text" value="Yes"/>                     |
| Thumb Button Name   | <input type="text" value="More Images"/>             |
| Embed URL Links     | <input type="text" value="yes"/>                     |
| <hr/>               |  |
| Image 1 Status      | <input type="text" value="Enable"/>                  |
| Image 1             | <input type="text" value="slideshow_001.jpg"/>       |
| Url for Image 1     | <input type="text" value="index.php"/>               |
| Title for Image 1   | <input type="text" value="Image 1 title"/>           |
| Text for Image 1    | <input type="text" value="type your text for here"/> |
| <hr/>               |  |
| Image 2 Status      | <input type="text" value="Enable"/>                  |
| Image 2             | <input type="text" value="slideshow_002.jpg"/>       |
| Url for Image 2     | <input type="text" value="index.php"/>               |
| Title for Image 2   | <input type="text" value="Image 2 title"/>           |
| Text for Image 2    | <input type="text" value="type your text for here"/> |

**Module Class Suffix:** the string that gets appended to the module if you want to assign more specific, individual styling. ( **Don't delete the pre defined suffix** )

**Use Mootools:** It must be disabled, because Joomla load the Mootools too

**Width:** The width of the slideshow in px. ( **Same size of your images** )

**Height:** The height of the slideshow in px. ( **Same height of your images** )

**Fade Duration:** The time it takes to transition between images in milliseconds

**Delay:** The duration each image is show for in milliseconds

**Show Infozone:** Set to NO if you dont want to show the slide infozone at the bottom of the images

**Infozone Height:** Only needed to change if youre using more text for the infozone

**Show Thumbs:** Set to NO if you dont want to show the thumbs at the top of the page

**Thumb Button name:** Set your own Button Name

**Embed URL Link:** Set to NO if you dont want to link to any Page

**Images Status:** Show or Hide the image. You have to enable if you want to show the image in the slideshow.

**Image 1:** Select your image, which is stored in /images/smooth\_gallery

**URL of Image:** Copy and paste your URL which should be linked thru.

**Title of Image:**The title of the slideshow image.

You can setup max 10 images into the Slideshow. If you need more images, please use a professional Gallery component.

1.) Upload your images to folder: JoomlaRoot/ images/smooth\_gallery/

2.) Those images will be listed in the module administrator and you can select them to be shown in the slideshow
