Image 2	<input type="text" value="slideshow_002.jpg"/>
Url for Image 2	<input type="text" value="http://www.joomlape"/>
Title for Image 2	<input type="text" value="Image 2 title"/>
Text for Image 2	<input type="text" value="type your text for here"/>

**Module Class Suffix:** the string that gets appended to the module if you want to assign more specific, individual styling. ( Don't delete the suffix **\_slideshow**)

**Use Mootools:** It must be disabled, because Joomla load the Mootools too

**Width:** The width of the slideshow in px. ( Same size of your images)

**Height:** The height of the slideshow in px. (Same height of your images)

**Fade Duration:** The time it takes to transition between images in milliseconds

**Delay:** The duration each image is show for in milliseconds

**Show Infozone:** Set to NO if you dont want to show the slide infozone at the bottom of the images

**Infozone Height:** Only needed to change if youre using more text for the infozone

**Images Status:** Show or Hide the image. You have to enable if you want to show the image in the slideshow.

**Image 1:** Select your image, which is stored in /images/smooth\_gallery

**URL of Image:** Copy and paste your URL which should be linked thru.

**Title of Image:**The title of the slideshow image.

**You can setup max 10 images into the Slideshow. If you need more images, please use a professional Gallery component.**

**1.) Upload your images to folder: JoomlaRoot/ images/smooth\_gallery/**

**2.) Those images will be listed in the module administrator and you can select them to be shown in the slideshow**
