Title for Image 2	<input type="text" value="Image 2 title"/>
Text for Image 2	<input type="text" value="type your text for second image here"/>

Module Class Suffix: the string that gets appended to the module if you want to assign more specific, individual styling. (**Don't delete the pre defined suffix**)

Use Mootools: It must be disabled, because Joomla load the Mootools too

Width: The width of the slideshow in px. (**Same size of your images**)

Height: The height of the slideshow in px. (**Same height of your images**)

Fade Duration: The time it takes to transition between images in milliseconds

Delay: The duration each image is show for in milliseconds

Show Infozone: Set to NO if you dont want to show the slide infozone at the bottom of the images

Infozone Height: Only needed to change if youre using more text for the infozone

Show Thumbs: Set to NO if you dont want to show the thumbs at the top of the page

Thumb Button name: Set your own Button Name

Embed URL Link: Set to NO if you dont want to link to any Page

Images Status: Show or Hide the image. You have to enable if you want to show the image in the slideshow.

Image 1: Select your image, which is stored in /images/smooth_gallery

URL of Image: Copy and paste your URL which should be linked thru.

Title of Image: The title of the slideshow image.

You can setup max 10 images into the Slideshow. If you need more images, please use a professional Gallery component.

1.) Upload your images to folder: JoomlaRoot/ images/smooth_gallery/

2.) Those images will be listed in the module administrator and you can select them to be shown in the slideshow
